Kpemlie Vincent Kwaku

Software Developer

vkkpemlie@outlook.com Accra, Ghana LinkedIn thelocalgodd

SUMMARY

Software developer experienced in JavaScript and TypeScript, building scalable and reliable web applications and services. Strong problem-solving skills, quick to learn, and focused on delivering clean, maintainable solutions.

SKILLS

Frontend Development
Javascript, Typescript, ReactJS, AstroJS, NextJS, TailwindCSS

Backend / Database
NodeJS, ExpressJS, MongoDB, PostgreSQL

Mobile Development
React Native w/ Expo

Tools
VSCode, Git, Github, Linux, Bruno, XCode, Docker, Dokploy, Coolify

PROFESSIONAL EXPERIENCE

Xenon LTD Apr 2025 – present
Software Developer Remote
- Developed an Admin Dashboard for a crossplatform, cross-border finance application that is currently serving in 42 Countries.
- Developed a Web Application for a crossplatform, cross-border remittance application that is currently serving in 42 Countries.
- Participated in weekly code reviews, performance assessments and client demos.

Uzeka Feb 2026 – Present
Fullstack Developer Remote
- Built a responsive, user-friendly admin dashboard supporting over 20 daily active users.

Mula Datahub Kumasi, Ghana
Backend / Infrastructure
Implemented a self-hosted deployment system using Dokploy, with CI/CD pipelines for seamless app delivery. Built and integrated a backend service with the frontend, supporting 1,000+ users with reliable performance and scalability.

PROJECTS

Soundwave Mobile App Aug 2024
Tech Stack: React Native (Expo), JavaScript, API
- Contributed to a music player app that allowed users to stream songs from a library of over 1,000 tracks via third-party APIs.
- Implemented audio playback functionality with seamless transitions and intuitive controls.
- Improved UI responsiveness and layout consistency across Android and iOS, boosting test user satisfaction by 30%.

KNUST Shuttle App Jan 2025 – present
Tech Stack: ReactJS, TailwindCSS, NodeJS, ExpressJS, MongoDB, Websockets
- A Web application and Mobile App that aims to helps 10k+ students and shuttle drivers access and navigate campus with Campus Shuttles more efficiently.

Beatam Noctem 4.0
Events Ticketing / Voting Platform
Tech Stack: TypeScript, ExpressJS, MongoDB, Paystack, Hubtel SMS, AWS S3, PDFKit
- Built an account-less ticketing flow: customers pay via Paystack and receive QR-coded PDF tickets through their email, removing all signup friction for attendees.
- Implemented Paystack webhook verification and idempotent order reconciliation so paid tickets are issued exactly once even under retried callbacks.
- Built an admin-only auth layer with JWT access + refresh tokens stored in httpOnly cookies, plus bcrypt-hashed credentials, and an AuditLog model recording every privileged action.
